HEAVY DUTY ELECTRICAL LEAD

CODE: EL10, EL15, EL20

Overview

Connect your caravan or RV to a suitable power supply at powered campsites with Supex 15 Amp Caravan Extension Leads. Available in three lengths, our flexible leads feature a heavy-duty casing, a bright orange colour for easy visibility and an illuminated socket that shows when power is present.

FAQ

WHAT DOES THE SOCKET LIGHT MEAN?

The LED lights up to show that power is present at the socket.

CAN I CONNECT IT TO A STANDARD 10A HOUSEHOLD POWER POINT?

You need a compliant caravan power adaptor with 10A overload protection and an RCD safety switch. The adaptor limits the available current to 10A.

SHOULD I FULLY UNCOIL THE LEAD BEFORE USE?

Yes. Always fully uncoil the lead before connecting power.
